I am a Junior at Grand Canyon University majoring in Computer Science. I have experience with several coding languages and game engines. I work well with those around me and I have experience leading teams. I am looking for an internship that will expand my knowledge from the classroom along with giving me real world experience in a field I'm passionate about.

EDUCATION

Bachelor of Science: Computer Science, Expected graduation in 05/2027

Grand Canyon University - Phoenix, AZ

SKILLS

C++, Python, C#, GDscript, HTML, java, SQL, Git, GitHub, Cisco Packet tracer, Godot, Unity, Word, Excel, PowerPoint, OneDrive, docs, sheets, drive, slides, command prompt, PowerShell, MongoDB, ChatGPT, Jupyter Notebook, OpenRouteServices API, Kali Linux

PROJECTS

Virtual Reality Adventure Game

- A Semester long project in which a group of three of us created a VR adventure game involving animations, level building, audio management, cooperativity, and creativity. The project was created using Unity, blender, and C#.

Text based Labyrinth Maker

- A text based Labyrinth game that allows the user to create, play, and save their labyrinth creations. The game was made using C++ and visual studio community.

Random Running Route Generator

- A program that can generate running routes depending on the users' desired time or mileage. It gets a location from the user and creates routes based off that position. Can generate both loops that go out and back on the same line or loops so the user doesn't travel on the same path for long.
